

Step-by-Step Installation Guide

Follow these quick instructions to set up the Lazada Buy Bot in your Google Chrome browser:

1 Search and Install Tampermonkey

Go to **Google.com** and search for "**Tampermonkey extension**" or navigate directly to the Chrome Web Store. Click **Add to Chrome** and approve the browser extension prompt.

2 Enable Developer Mode

Open Chrome extensions page by clicking the puzzle icon in the top-right corner, then select **Manage Extensions** (or navigate to **chrome://extensions/**). In the top-right corner, toggle **Developer mode** to **ON**.

3 Grant Local File & Site Access

Find the **Tampermonkey** card on the extensions page, then click **Details**. Scroll down and turn **ON** the option for **Allow access to file URLs**. Set Site Access to **On all sites**.

Part A: Create a Bot via @BotFather

1. Open Telegram and search for the official account **@BotFather**.
2. Send the `/newbot` command and choose a name and username (must end in `_bot`).
3. Copy the generated **HTTP API Token** (e.g. `8156587833:AAEwTA...`) and place it in the `tgBotToken` configuration.
4. Start a chat with your newly created bot to initialize it.

Part B: Find Your Chat ID

1. Search for **@userinfobot** or **@GetIDsBot** on Telegram.
2. Start the chat. The bot will instantly return your profile info including your numeric **Id**.
3. Copy the ID number and paste it into the `tgChatId` configuration.

How to Use the Bot on Lazada

1. Open any Lazada product page.
2. A sleek, dark glassmorphism panel called  **Lazada Buy Bot** will appear in the bottom-right corner.
3. Click ► **Start Bot**. If the item is out of stock, it will cycle page refreshes automatically.
4. When the item restocks, the bot sets the quantity, clicks **Buy Now**, chooses delivery options, inputs card details, and submits.

 **Manual Confirmation Alert:** If the bot cannot automatically click the final confirm button or a manual verification (e.g. 3D secure verification) is required, the bot pre-fills all credit card details, stops, and instantly sends a message to your Telegram:

" *Lazada Action Required: Manual Confirm Needed*"
